

Dr. Seuss Wild and Wacky Science Camp
June 26th – June 29th

We are jumping into a wild and wacky camp with a Dr. Seuss theme. Join us as we drive into four Dr. Seuss books and introduce science in each one. Shadows, sun prints, oobleck, solids, the life cycle of trees and turtles to name just a few. This camp will be a little messy with a lot of hands on projects. Come prepared to get a little dirty and have a lot of fun!

The list of books are:

The Shape of Me
Bartholomew and the Oobleck
The Lorax
Yertle the Turtle

Animal Antics
July 10th to July 13th

Bug & Animal Antics! Creepy crawling bugs, puppy powers, zoo shenanigans, and cool critters all make up a week of summer fun. These ideas will help keep your child's mind active through those dog days of summer (pun definitely intended). Throw on your zebra stripes, create a bug shelter, slap on your rhinoceros horn, and let the bug and animal antics begin!

2.5 to 4 Year Old Camp
July 10th – July 13th

This camp is great for students that are new to preschool or just want to enjoy some friendship. Students will meet new friends, make some fun crafts, paint, sing songs, play various games, have a snack and eat lunch at school.

Monday-Thursday: Play dough, bubble mania, painting, crafts, creating shapes, sensory bins, music and movement, field activities, games and recess,
Thursday: Water Play (please pack a towel and swimsuit)

Art Camp

July 17th - July 20th

Welcome to a world of art! We will explore famous artists, such as Picasso and Seurat, Jackson Pollock and Frank Lloyd Wright, Georgia O'Keeffe and Dorothea Lange, as well as Van Gogh and Rodin. Come and make a painting, clay sculpture, or collage, and just explore the possibilities of what you can create! We'll also play games with famous paintings, have an art show, and listen to some wonderful Classical music. Come join us!

Monday-- Abstract Painting:

Jackson Pollock (splatter paint)
Marcel Duchamp (painting with strings)
Pablo Picasso (abstract)

Tuesday-- Sculpture:

Alexander Calder (standing mobile)
Frank Lloyd Wright (architecture with toothpicks and marshmallows)

Wednesday-- Clay Sculpture:

Auguste Rodin (modeling clay)
Wassily Kandinsky (color and form)
Georges Seurat (pointillism)

Thursday-- Painting:

Berthe Morisot (texture painting)
Vincent Van Gogh (Starry Night)

Building and Bring Books to Life
July 24th July 27th

Imagine bring a book to life. The possibilities are endless! Join us this week as we creatively introduce four books and bring them to life. We will be making characters, creating props, illustrating our own books, building a car and using our imagination on crafts. You don't want to miss out on this camp. Your child will live the dream of pretending to be the characters in each book!

Books for the week:

Monday: Nibbles

Tuesday: Pete the Cat

Wednesday: Hungry Caterpillar

Thursday: If I built a Car

Dinosaur Camp

August 7 to 10

Roar! We'll be stomping, romping and chomping through our day. Join us this week as we dig up fossils, defrost frozen dinosaurs, create dinosaur tracks and crack open dinosaur eggs. A cool volcano will erupt during camp and we will go over some exciting Dino facts. We'll be reading some non-fiction and fiction books and learning some cool dinosaur dances and songs.

Earth, Wind and Slime Camp

July 31st – August 3rd

Natalie Meserve will be teaching this camp. Come have fun exploring the world around us with teacher Natalie! Each day we'll investigate a new Science topic about Solids, Liquids, and Gasses. We will make balloon rockets, create a worm farm, go ice fishing, and make slime!

Monday—Water

- Sink and float
- "catching" ice cubes with string
- solid, liquid, gas
- What dissolves in water?
- ice cube: painting
- underwater animals (dolphins, whales, sharks): sensory bin
- water, underwater animals: books
- shark: craft
- goldfish crackers: snack

Tuesday—Wind

- How much air to fill up a balloon?
- How many balloons to hold up a toy?
- How to make bubbles
- Balloon rockets
- Hovercraft with cds
- Volcano experiment

Wednesday—Land

- Parts of a plant and growing seeds
- Make a worm farm
- Painting with leaves, etc
- Dirt: sensory bin
- Plants and animals: books
- Parts of a plant: craft
- Seeds: snack

Thursday—slime

- Making slime
- Dr seuss: books
- Jello: snack
- Liquid vs solid
- Playdough activity
- Straw blowing: painting

Fundamentals of Music Camp
August 7-10th

Want to have your child play an instrument, but not sure where to start? Music Camp is a great introduction to new songs, fun instruments, basic rhythms, and note recognition.

We will work with keyboards, reorders, and rhythm sticks, among other things. We'll make some basic instruments, and we'll play fun games with music! Expect a short performance on the final afternoon.

Princess Dance Camp

July 24th to July 27th

Your little princess will be pampered this week! Tiare-Lee Dettloff will lead them to a magical world of dancing, singing, creating cute crafts and making lots of friends. We will also be creating a princess story book starring your child. We are prepared to have lots of squealing and giggling little girls!!! On the last day of camp your little one will perform a mini recital.

Art of the World
August 14th - August 17th

Join us as we explore art around the world. Your little one will also be introduced to some culture and history.

Monday - Japan

.cotton ball sushi games

.origami

.Mt. Fuji painting

.calligraphy

.kites

Tuesday - Pakistan

. henna hands

.mosaics

.truck art

.textiles

.language study

Wednesday - Brazil

. carnival masks

.Britto art

.maraccas

.rainforest layers

.rainforest animals

Thursday - Kenya

.Maasai necklace

.sunset painting

.bead craft

.drums

.crocodile craft

.Kilimanjaro

Maritime and Marine life Camp
August 21st to August 24th

What better way to spend part of your summer then to learn about sailing and all the wonders of the ocean. It's usually so cold throughout the year so this camp is perfect for warm August weather.

How does a boat float? What makes a sail boat move? We will have some maritime fun as we learn about sailing and create our very own boats. Then we will move on to the magnificent world of marine life. We will unleash a magnitude of fascinating information about the ocean and some special sea life that God created. Students will learn through exploring, art/crafts, hands on sea life and sensory bins. It is a world that few get to explore. On the last day of this camp we will catch the Kitsap Transit and explore our very own bay at low tide.

Monday: Boats and sailing. We will create, build and name our very own boats.

Tuesday: Maritime fun as we create an ocean and sail our boats.

Wednesday: Marine life in our ocean. Learn about sea life as small as a bug and as big as a truck. Learn how they share and live in the ocean, what they eat and where do they sleep.

Thursday: Field trip to the bay. We will explore the low tide, float our boats in the ocean and build sand castles.

Sports Camp
August 21st - August 24th

Get ready, get set, GO! I hope your child has lots of energy because this camp was made for students that have an endless amount. We will learn sportsmanship, how to encourage and support your teammates, confidence in playing a sport and teamwork. Your child will also learn the fundamentals of basketball, soccer and flag football. We will also be playing dodgeball with a foam ball, timing your child on a 50 meter dash, seeing how far your child can jump and other fun field games. Girls don't be shy! We will have teenagers of both genders helping with this camp.
